INSTRUCTIONS TO USE MY MATH TEST

- Click on “Register Now” to set up username and password. You will use the Access Code found in the MyMathTest kit given to you by the SOS coordinator at the LRC front desk.

- Login using the username and password you created.

- Click on “Enroll in a new MyMathTest Program” and type in the code (the 0 is the zero).

Code for Arithmetic Review: SOS instructor will give to you in class.

Code for Algebraic Review: SOS instructor will give to you in class.

- You will be directed to the announcement page provided by the software program. Do the following two suggestions.
  o Run the Browser Check.
  o View the tutorial on “How to enter my answers”.

The on-line instructor may also post announcements throughout the program. Always read the announcement page carefully.

- Click on the Take a Test button on the left side of screen.

- Click on the homework assignment to be completed.

- Click on the I am ready to start button and you will be directed to your first question.
  ***Before you begin the test you may want to view a tutorial on “how to enter your answers”.

- Once you complete the question, click on the Next button for the next question. Do NOT HIT THE SUBMIT BUTTON; this will terminate your session.

- When you have reached the last question, you will only have the option to click on the Previous button or the Submit button. Click on the Previous button to review and change answers to questions you have answered already. You can return to questions at any time. Or click on the Submit button if you are finished with the assignment.

- When you click on the Submit button, it will lead you to the screen that gives you the results. To review the problem and the answer for the incorrect questions, click on the problem number.

- Click on the Go To Results button.

- Click on the Study Plan button. This will lead you to a plan for you to practice and study based upon the results of your assignments.

- Click on the Show What I Need to Study button. This will take you to the topics that you need to review based on the incorrect answers.

Click on a particular topic indicated by the pencil icon.
NOTE: If you did not complete the entire homework assignment in one sitting, then the questions you left blank or did not answer will be documented as incorrect in your study plan.

• Click on an exercise and it will lead you to a practice problem. There are several options for you.

1) You may answer the question. If the question is correct, you then may click on Similar Exercise for more practice problems or you may click Close if you understand the problem. If you answer the question incorrectly, a pop-up box will give you hints about how to solve the problem. You can retype your answer and check it again.

2) Before you answer the question, you may want explanations on how to do the problem. The buttons on the right give you many options to help you understand the problem better. Help Me Solve This button leads you through the solution one step at a time with your participation. View an Example button works out the problem step by step for you by the software. Video button (you will see the icon when it’s available) will demonstrate the problem using a video. You must have QuickTime Movie on your computer. Ask My Instructor button allows you to e-mail your questions to the tutor/instructor. Print button allows you to print out the question so that you may bring it with you to a tutorial session or SOS class.

• Once you hit the Close button, you will be led back to the list of topics you need to review. Continue to click on the topics with the pencil icon.

NOTE: You may always continue to practice problems in your study plan by clicking on the Study Plan button on the left hand side.
